GenAI Engineer with 5+ years of experience in Python, Generative AI, Agentic AI and React full-stack development. Skilled in building end-to-end AI applications from intelligent backend services to responsive user interfaces. Experienced in integrating LLMs, OCR, and automation pipelines into real-world business workflows, with a strong focus on scalable and user-centric solutions.

WORK EXPERIENCE

Genpact (Senior AI Engineer)	Bangalore, Karnataka July 2024 - Present
- Led development of Agentic AI solutions using multi-agent orchestration, LLMs, and Azure OpenAI to automate enterprise workflows and improve operational efficiency. - Designed and implemented a Text-to-SQL AI system enabling business users to query enterprise databases using natural language, improving reporting accessibility and reducing manual SQL dependency. - Built intelligent GenAI and document intelligence pipelines using Azure OpenAI and Azure Document Intelligence, achieving high-accuracy invoice and business document extraction across 500+ document samples. - Implemented reusable Agentic AI frameworks for country-specific business logic and enterprise integrations, accelerating onboarding of new regions by ~35%. - Integrated enterprise systems (SNI, SFDC, Direct) through API-driven architectures, improving synchronization reliability and reducing integration failures. - Optimized application architecture by shifting core logic to backend and database layers, improving system scalability, cloud performance, and operational stability on Azure. - Collaborated with cross-functional stakeholders in client-facing architecture and solution design discussions to align AI implementations with business objectives. - Key contributor to Genpact AP Trace, an Agentic AI-based invoice duplicate detection platform that proactively identified duplicate invoices and reduced financial leakage risks.	
CGI (Software Engineer)	Bangalore, Karnataka June 2021 – June 2024
- Developed Python-based automation to streamline enterprise workflows, reducing manual effort by 40–50%. - Designed and maintained scalable backend architecture supporting high-performance web applications. - Designed and developed React.js applications for automation tools, dashboards, and internal portals. - Created reusable React components and integrated frontend with backend APIs, cutting feature delivery time by ~30%. - Automated web workflows using Selenium, improving reliability and reducing processing failures. - Implemented backend solutions using Python, Flask/FastAPI, PostgreSQL, and Redis to improve application efficiency.	

EDUCATION

Qualification	Institute	CGPA / Percentage	Year of Completion
Bachelor of Technology	NIT Jalandhar	CGPA – 7.92/10	2017 - 2021
Class XII	GGN Public School, Ludhiana	91.8 %	2016 - 2017
Class X	GGN Public School, Ludhiana	CGPA – 10/10	2014 - 2015

TECHNICAL SKILLS

- Languages:** Python, JavaScript, SQL, C++
- Frontend:** ReactJS, Redux Toolkit, MUI (Material-UI), Tailwind CSS
- Backend & APIs:** FastAPI / Flask, REST APIs
- AI / ML / GenAI:** Generative AI, LLMs, Prompt Engineering, LangChain, LangGraph, RAG, Azure OpenAI, Azure Document Intelligence, Scikit-Learn, TensorFlow, Keras, NLTK
- Data & Visualization:** NumPy, Pandas, Matplotlib, Seaborn
- Automation & Tools:** Selenium, Git, Linux
- CS Fundamentals:** Data Structures, Algorithms, Object-Oriented Programming

CERTIFICATIONS

- [Databricks Certified Generative AI Engineer Associate](#) – July 2025
- [HackerRank - Problem Solving Skills](#) – Nov 2023
