GenAI Engineer with 5+ years of experience in Python, Generative AI, Agentic AI and React full-stack development. Skilled in building end-to-end AI applications from intelligent backend services to responsive user interfaces. Experienced in integrating LLMs, OCR, and automation pipelines into real-world business workflows, with a strong focus on scalable and user-centric solutions.

WORK EXPERIENCE

Genpact
(Senior AI Engineer)

Bangalore, Karnataka
July 2024 - Present

- Led development of **Agentic AI solutions** using multi-agent orchestration, LLMs, and Azure OpenAI to automate enterprise workflows and improve operational efficiency.
- Contributed to the design and enhancement of **AP Trace**, an **AI-powered invoice duplicate detection platform** that helped identify potential duplicate payments before invoice processing.
- Integrated invoice data from **SAP ERP, Esker, and other enterprise systems** to improve duplicate detection accuracy and reduce financial leakage risks.
- Collaborated with **Accounts Payable (AP) teams** to investigate invoice exceptions, optimize business rules, and improve fraud prevention controls.
- Built intelligent validation workflows to analyze invoice attributes such as **vendor details, invoice numbers, amounts, PO references, and payment records**.
- Developed and deployed an **Agentic AI-powered AP Helpdesk** solution that automated responses to vendor and employee queries related to invoice status, payment status, purchase orders, and finance operations.
- Designed and implemented a **Text-to-SQL AI system** enabling business users to query enterprise databases using natural language, improving reporting accessibility and reducing manual SQL dependency.
- Automated handling of common **AP requests** such as invoice lookup, payment inquiries, vendor onboarding guidance, and exception management, reducing manual support effort.
- Built **monitoring and feedback mechanisms** to continuously improve response quality, user adoption, and operational efficiency.
- Worked closely with **finance stakeholders** to validate AI-generated responses and ensure **compliance** with enterprise **finance processes** and controls.
- Built intelligent **GenAI and document intelligence pipelines** using Azure OpenAI and Azure Document Intelligence, achieving high-accuracy invoice and business document extraction across 500+ document samples.
- Implemented reusable **Agentic AI frameworks** for country-specific business logic and enterprise integrations, accelerating onboarding of new regions by ~35%.
- Integrated enterprise systems (SNI, SFDC, Direct) through API-driven architectures, improving synchronization reliability and reducing integration failures.
- Collaborated with cross-functional stakeholders in client-facing architecture and solution design discussions to align AI implementations with business objectives.

CGI
(Software Engineer)
2024

Bangalore, Karnataka
June 2021 – June

- Developed **Python-based automation** to streamline enterprise workflows, reducing manual effort by **40–50%**.
- Designed and maintained **scalable backend architecture** supporting high-performance web applications.
- Designed and developed **React.js applications** for automation tools, dashboards, and internal portals.
- Created **reusable React components** and integrated frontend with backend APIs, cutting feature delivery time by ~30%.
- Automated web workflows using **Selenium**, improving reliability and reducing processing failures.
- Implemented backend solutions using **Python, Flask/FastAPI, PostgreSQL, and Redis** to improve application efficiency.

EDUCATION

Qualification	Institute	CGPA / Percentage	Time of Completion
Bachelor of Technology	NIT Jalandhar	CGPA – 7.92/10	August 2017 – May 2021
Class XII	GGN Public School, Ludhiana	91.8 %	April 2016 – March 2017
Class X	GGN Public School, Ludhiana	CGPA – 10/10	April 2014 – March 2015

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, SQL, C++
- **Frontend:** ReactJS, Redux Toolkit, MUI (Material-UI), Tailwind CSS
- **Backend & APIs:** FastAPI / Flask, REST APIs
- **AI / ML / GenAI:** Generative AI, LLMs, Prompt Engineering, LangChain, LangGraph, RAG, Azure OpenAI, Azure Document Intelligence, Scikit-Learn, TensorFlow, Keras, NLTK
- **Data & Visualization:** NumPy, Pandas, Matplotlib, Seaborn
- **Automation & Tools:** Selenium, Git, Linux
- **CS Fundamentals:** Data Structures, Algorithms, Object-Oriented Programming
-

CERTIFICATIONS

- [Databricks Certified Generative AI Engineer Associate](#) – July 2025
- [HackerRank - Problem Solving Skills](#) – Nov 2023
